

**GREEN SOD
IRELAND**
PROTECTING WILD ACRES

Steps towards a donation of land to Green Sod Ireland

1. Initial meeting with a potential donor and a member of Green Sod Ireland (GSI).
2. Tour the donor's property.
3. Review of the donor's property and conservation goals with GSI board of directors.
4. Clarification, for donor, of GSI ethos, and for GSI of donor's wishes.
5. Consultation with legal advisors.
6. Compilation of a basic report of the donor's property and that which transpired at the meeting of the two parties.
7. The donor provides the legal description and relevant information to GSI.
8. GSI evaluator evaluates the property.
9. Legalities in order, and both donor and GSI in total agreement: transfer occurs.
10. Green Sod Ireland always advises that potential donors seek their own legal advice in relation to such matters, and that any transfers are, of course, subject to legal contract, with such contract denied until agreement of both parties, and completion of contract is in place.
